

Medicare made up about one-fifth of spending on personal health care in 2004

Note: SCHIP (State Children's Health Insurance Program). Out-of-pocket spending includes cost sharing for both privately and publicly insured individuals. Personal health care spending includes spending for clinical and professional services received by patients. It excludes administrative costs and profits. Premiums are included with each program (e.g., Medicare, private insurance), rather than in the out-of-pocket category.

^a Includes industrial in-plant, privately funded construction, and nonpatient revenues, including philanthropy.

^b Includes programs such as workers' compensation, public health activity, Department of Defense, Department of Veterans Affairs, Indian Health Service, state and local government hospital subsidies, and school health.
