How much lower would federal Medicaid/CHIP spending be under the revised BCRA than under the ACA in 2022?

National average: 26.3%

Less than 20%  20–30%  30–40%  40–50%  More than 50%

The data show the decrease in federal Medicaid and CHIP spending in each state under the proposed Better Care Reconciliation Act as revised on July 13, 2017, relative to the ACA in 2022. These estimates do not include Title III, the so-called Cruz provisions.
