

# In Search of Resources about Using Administrative Data in Early Care and Education

Help us update “[Working with Administrative Data](#),” a compilation of resources about how to analyze, link, or manage state-level early care and education (ECE) administrative data for research purposes.

Share your reports, toolkits, webinars, or other resources about using administrative data in early childhood or related fields, including those that

- highlight advantages and disadvantages to using administrative data;
- detail steps or procedures about how to use administrative data;
- provide state examples about administrative data use; or
- are tools or toolkits that house information about administrative data.

We invite you to share your relevant work with us.

Examples include:

- webinars on how to link and integrate two or more administrative datasets;
- toolkits that describe best practices for data-use agreements;
- reports that describe innovative methods for analyzing state-level administrative data; and
- briefs summarizing lessons learned about data governance or other aspects of managing data.

We are collecting publicly available materials or those that will become publicly available by September 2020. Please include URL information if available.

This work is being done by the Child Care Research and Evaluation Capacity Building Center, a project funded by the Office of Planning, Research, and Evaluation, Administration for Children and Families, U.S. Department of Health and Human Services. Please send all materials, along with your contact information, via email to [CCDBGbibliography@urban.org](mailto:CCDBGbibliography@urban.org) by July 30, 2020.
