Robert Lerman, PhD, Institute Fellow, Urban Institute: [rlerman@urban.org](mailto:rlerman@urban.org)

## ABOUT THE URBAN INSTITUTE

The nonprofit Urban Institute is dedicated to elevating the debate on social and economic policy. For nearly five decades, Urban scholars have conducted research and offered evidence-based solutions that improve lives and strengthen communities across a rapidly urbanizing world. Their objective research helps expand opportunities for all, reduce hardship among the most vulnerable, and strengthen the effectiveness of the public sector.

## Acknowledgments

We are grateful to Rebecca Malberg von Loewenfeldt and Neelan Gupta of the Healthcare Career Advancement Program (“H-CAP”) for their help with this document. We also thank the many representatives of the health and medical field who contributed to this effort.

# Competency-Based Occupational Frameworks

The Urban Institute, under contract by the U.S. Department of Labor, has worked with employers, subject matter experts, labor unions, trade associations, credentialing organizations and academics to develop Competency-Based Occupational Frameworks (CBOF) for Registered Apprenticeship programs. These frameworks defined the **purpose** of an occupation, the **job functions** that are carried out to fulfill that purpose, the **competencies** that enable the apprentice to execute those job functions well, and the **performance criteria** that define the specific knowledge, skills and personal attributes associated with high performance in the workplace. This organizational hierarchy – Job Purpose – Job Functions – Competencies – Performance Criteria – is designed to illustrate that performing work well requires more than just acquiring discrete knowledge elements or developing a series of manual skills. To perform a job well, the employee must be able to assimilate knowledge and skills learned in various settings, recall and apply that information to the present situation, and carry out work activities using sound professional judgment, demonstrating an appropriate attitude or disposition, and achieving a level of speed and accuracy necessary to meet the employer’s business need.

The table below compares the terminology of Functional Analysis with that of traditional Occupational Task Analysis to illustrate the important similarities and differences. While both identify the key technical elements of an occupation, Functional Analysis includes the identification of behaviors, attributes and characteristics of workers necessary to meet an employer’s expectations.

Framework Terminology	Traditional Task Analysis Terminology
Job Function – the work activities that are carried out to fulfill the job purpose	Job Duties – roles and responsibilities associated with an occupation
Competency – the actions an individual takes and the attitudes he/she displays to complete those activities	Task – a unit of work or set of activities needed to produce some result
Performance Criteria – the specific knowledge, skills, dispositions, attributes, speed and accuracy associated with meeting the employer’s expectations	Sub Task – the independent actions taken to perform a unit of work or a work activity

Although designed for use in competency-based apprenticeship, these Competency-Based Occupational Frameworks also support time-based apprenticeship by defining more clearly and precisely what an apprentice is expected to learn and do during the allocated time-period.

CBOFs are comprehensive to encompass the full range of jobs that may be performed by individuals in the same occupation. As employers or sponsors develop their individual apprenticeship programs, they can extract from or add to the framework to meet their unique organizational needs.

## Components of the Competency-Based Occupational Framework

**Occupational Overview:** This section of the framework provides a description of the occupation including its purpose, the setting in which the job is performed and unique features of the occupation.

**Work Process Schedule:** This section includes the job functions and competencies that would likely be included in an apprenticeship sponsor's application for registration. These frameworks provide a point of reference that has already been vetted by industry leaders so sponsors can develop new programs knowing that they will meet or exceed the consensus expectations of peers. Sponsors maintain the ability to customize their programs to meet their unique needs, but omission of a significant number of job functions or competencies should raise questions about whether or not the program has correctly identified the occupation of interest.

**Cross-cutting Competencies:** These competencies are common among all workers, and focus on the underlying knowledge, attitudes, personal attributes and interpersonal skills that are important regardless of the occupation. That said, while these competencies are important to all occupations, the relative importance of some versus others may change from one occupation to the next. These relative differences are illustrated in this part of the CBOF and can be used to design pre-apprenticeship programs or design effective screening tools when recruiting apprentices to the program.

**Detailed Job Function Analysis:** This portion of the framework includes considerable detail and is designed to support curriculum designers and trainers in developing and administering the program. There is considerable detail in this section, which may be confusing to those seeking a more succinct, higher-level view of the program. For this reason, we recommend that the Work Process Schedule be the focus of program planning activities, leaving the detailed job function analysis sections to instructional designers as they engage in their development work.

- a. **Related Technical Instruction:** Under each job function appears a list of foundational knowledge, skills, tools and technologies that would likely be taught in the classroom to enable the apprentice's on-the-job training safety and success.

- b. Performance Criteria: Under each competency, we provide recommended performance criteria that could be used to differentiate between minimally, moderately and highly competent apprentices. These performance criteria are generally skills-based rather than knowledge-based, but may also include dispositional and behavioral competencies.

## **Using the Competency-Based Occupational Framework to Develop a Registered Apprenticeship Program**

When developing a registered apprenticeship program, the Work Process Schedule included in this CBOF provides an overview of the job functions and competencies an expert peer group deemed to be important to this occupation. The Work Process Schedule in this document can be used directly, or modified and used to describe your program content and design as part of your registration application.

When designing the curriculum to support the apprenticeship program – including on the job training and related technical instruction – further information in Detailed Job Functions could be helpful. These more detailed job function documents include recommendations for the key knowledge and skill elements that might be included in the classroom instruction designed to support a given job function, and the performance criteria provided under each competency could be helpful to trainers and mentors in evaluating apprentice performance and insuring inter-rater reliability when multiple mentors are involved.

# Surgical Technologist (Alternate Title: Operating Room Specialist) Occupational Overview

## Occupational Purpose and Context

Surgical technologists (also referred to as “Operating Room Specialists”, but will be referenced as Surgical Technologist in this document and aligning materials) work as members of a healthcare team alongside physicians and surgeons, registered nurses, and other healthcare workers.

Before an operation, surgical technologists prepare the operating room by setting up surgical instruments and equipment. They also prepare patients for surgery by washing and disinfecting incision sites, positioning the patients on the operating table, covering them with sterile drapes, and taking them to and from the operating room. Surgical technologists prepare sterile solutions and medications used in surgery and check that all surgical equipment is working properly. They help the surgical team put on sterile gowns and gloves.

During an operation, surgical technologists pass instruments and supplies to surgeons and first assistants. They also hold retractors, hold internal organs in place during the procedure, or set up robotic surgical equipment. Technologists also may handle specimens taken for laboratory analysis.

Once the operation is complete, surgical technologists may apply bandages and other dressings to the incision site. They may also help transfer patients to recovery rooms and restock operating rooms after a procedure.

## Potential Job Titles

Surgical Technologist; Tech in Surgery – Certified; Certified Surgical Technologist; Operating Room Technician

## Attitudes and Behaviors

Persons who are successful in becoming surgical technologists possess a strong sense of responsibility, are able to anticipate and respond appropriately to perceived needs without being asked, and have considerable patience and concern for others. Such persons function well in a team, perform accurately and efficiently under pressure, and possess manual dexterity and fine motor coordination.

Other terms to describe attitudes and behaviors of surgical technologists include: *Efficient, emotionally stable, ethical, flexible, able to follow directions, honest, intuitive, organized, hygienic, physically fit, punctual, receptive, reliable, respecting of patient privacy, responsible, possessing a sense of humor.*

## Apprenticeship Prerequisites

Surgical Technologists must complete post-secondary training (from a one year program to an Associate's Degree program) and/or have experience as a surgical assistant in a medical or military setting. Surgical technology education programs include courses in anatomy, physiology, biology, medical terminology, pharmacology and anesthesia, microbiology, pathophysiology, and often some technological and other instruction. Previous certification as a surgical technologist, a set number of years of experience as a surgical technologist, and/or military training and experience as a military surgical technologist can qualify a person to take the certification exam for certification renewal, depending on the type of certification. Participation in a training program requires a complete background check, documentation of current required-immunizations and current Healthcare Provider Cardiopulmonary Resuscitation (CPR) certification.

## Occupational Pathways

In addition to persons in other health care positions, some people move into surgical technology by getting credentialing following a BS in Biology or health-related field.

Some surgical technologists become specialized surgical technicians, with expertise in wound preparation, plastic surgery, neurosurgery, organ transplantation, sterilization, pharmacology, anesthesia, or heart surgery.

Some surgical technologists advance to become Surgical First Assistants. Surgical first assistants often work as surgical technologists and receive additional on-the-job training before becoming first assistants. Others may complete a formal education program in surgical assisting. Surgical first assistants have a hands-on role, directly assisting surgeons during a procedure. For instance, they may help to suction the incision site or suture a wound.

Other career pathways for surgical technologists include moving into nursing or hospital management positions.

## Certifications, Licensure and Other Credential Requirements

CREDENTIAL	Offered By	Before, During or After Apprenticeship
Certified Surgical Technologist (CST)	National Board of Surgical Technology and Surgical Assisting	Before
Tech in Surgery-Certified: TS-C(NCCT)	National Center For Competency Testing	Before or during

## Job Functions

JOB FUNCTIONS		Core or Optional	Level
1.	Prepare for Surgical Procedures	Core	
2.	Perform Intraoperative Duties/Activities	Core	
3.	Perform Postoperative Procedures and Room Turnover	Core	
4.	Assist Circulator	Core	
5.	Recognize and Demonstrate Knowledge of the Maintenance of Surgical Supplies/Equipment	Core	
6.	Provide Safe Environment	Core	
7.	Perform Departmental Responsibilities	Core

A. Prepare the operating room environment according to the surgical procedure	Core		
B. Prepare for the specific procedure	Core		
C. Establish sterile field	Core		
D. Take preoperative precautions	Core		
E. Prepare the patient and surgical team	Core		
F. Participate in surgical time out	Core		

<b>JOB FUNCTION 2: Perform Intraoperative Duties/Activities</b>			
Competencies	Core or Optional	OJT	RTI
A. Maintain the operating room environment according to surgical procedure	Core		
B. Provide the surgical team members with supplies required for the procedure	Core		
C. Assemble and test materials and specialty equipment during surgery	Core		
D. Anticipate needs during surgery	Core		
E. Provide intraoperative assistance when delegated by a surgeon	Core		
F. Handle medications, solutions, and specimens appropriately	Core		
G. Perform closing sponge, needle, and instrument counts	Core		
<b>JOB FUNCTION 3: Perform Postoperative Procedures and Room Turnover</b>			
Competencies	Core or Optional	OJT	RTI
A. Conduct postoperative patient care	Core		
B. Dispose of waste	Core		
C. Conduct room turnover after surgery	Core		
<b>JOB FUNCTION 4: Assist Circulator</b>			
Competencies	Core or Optional	OJT	RTI
A. Assist with/provide patient care	Core		
B. Assist with supplies and equipment	Core		
<b>JOB FUNCTION 5: Recognize and Demonstrate Knowledge of the Maintenance of Surgical Supplies/Equipment</b>			
Competencies	Core or Optional	OJT	RTI
A. Wash and decontaminate instruments	Core		
B. Ultrasound, milk, rinse and dry instruments	Core		

C. Assemble instrument trays	Core		
D. Prepare for and operate sterilizers	Core		
<b>JOB FUNCTION 6: Provide Safe Environment</b>			
Competencies	Core or Optional	OJT	RTI
A. Maintain a safe preoperative environment	Core		
B. Maintain a safe intraoperative environment	Core		
C. Maintain a safe postoperative environment	Core		
D. Practice precautions with critical equipment	Core		
E. Practice general safety precautions	Core		
<b>JOB FUNCTION 7: Perform Departmental Responsibilities</b>			
Competencies	Core or Optional	OJT	RTI
A. Receive/participate in dept. communications	Core		
B. Inventory supplies	Core		
C. Rotate supplies	Core		
D. Order supplies	Core		
E. Create/update surgeon preference cards	Core		
F. Attend inter/intra departmental committees	Core		
G. Maintain cleanliness of department	Core		
<b>JOB FUNCTION 8: Maintain Professional Responsibility</b>			
Competencies	Core	OJT	RTI
A. Maintain institutional competencies	Core		
B. Practice cost containment	Optional		
C. Attend/contribute to in-service classes	Core		
D. Evaluate new equipment	Optional		
E. Precept new employees/students	Core		
F. Participate in performance improvement activities	Core		

## Related Technical Instruction Plan

Note: Accredited instruction plans for surgical technologists vary across training institutions. The plan described below is an example of coursework required for a basic degree in Surgical Technology. Other plans, especially those for an Associate Degree in Surgical Technology, can include additional core curricula.

<b>COURSE NAME: GENERAL ANATOMY AND PHYSIOLOGY</b>	<b>Course Number</b>
	<b>Hours: 60 total</b>
<b>LEARNING OBJECTIVES</b>	
<p><b>General Anatomy and Physiology</b> examines basic concepts of human anatomy and physiology as they relate to health sciences. Using a body systems approach, the course emphasizes the interrelationships between structure and function at the gross and microscopic levels of organization, of the entire human body. It is intended to prepare health care professionals who need to apply basic concepts of whole body anatomy and physiology to informed decision-making and professional communication with colleagues and patients.</p>	
<b>COURSE NAME: MEDICAL TERMINOLOGY</b>	<b>Course Number</b>
	<b>Hours: 45 total</b>
<b>LEARNING OBJECTIVES</b>	
<p><b>Medical Terminology</b> focuses on the component parts of medical terms: prefixes, suffixes and word roots. Students practice formation, analysis and reconstruction of terms. Emphasis is on spelling, definition and pronunciation. Introduction to operative, diagnostic, therapeutic and symptomatic terminology of all body systems, as well as systemic and surgical terminology, is included.</p>	
<b>COURSE NAME: WRITTEN COMMUNICATION</b>	<b>Course Number</b>
	<b>Hours: 45 total</b>
<b>LEARNING OBJECTIVES</b>	
<p><b>Written Communication</b> develops writing skills which include prewriting, drafting, revising, and editing. A variety of writing assignments is designed to help the learner analyze audience and purpose, research and organize ideas, and format and design documents based on subject matter and content. Written Communication also develops critical reading and thinking skills through the analysis of a variety of written documents.</p>	

<b>COURSE NAME: SURGICAL TECHNOLOGIST FUNCTIONAL MICROBIOLOGY</b>	<b>Course Number</b>
	<b>Hours: 15 Total</b>
<b>LEARNING OBJECTIVES</b>	
<p><b>Surgical Technologist Functional Microbiology</b> introduces general classification, structure and physiology of microorganisms. Students learn the relationship between microorganisms and the human host as well as microbes in the hospital environment. Examines the study of the disease process, transmission of disease and methods of controlling microbial growth.</p>	
<b>COURSE NAME: SURGICAL TECHNOLOGY INTRODUCTION</b>	<b>Course Number</b>
	<b>Hours: 60 total</b>
<b>LEARNING OBJECTIVES</b>	
<p><b>Surgical Technology Introduction</b> provides the foundational knowledge of infection control and asepsis. Legal and ethical issues encountered in the healthcare environment are explored. Simulated laboratory practice enables the learner to develop beginning technical skills</p>	
<b>COURSE NAME: SURGICAL TECHNOLOGY FUNDAMENTALS</b>	<b>Course Number</b>
	<b>Hours: 90 Total</b>
<b>LEARNING OBJECTIVES</b>	
<p><b>Surgical Technology Fundamentals</b> includes the basic clinical skills needed by the Surgical Technologist in the scrub role. Learners develop skills in identifying basic instrumentation, supplies, drains, catheters, dressings and sponges. Includes practice experience in creating a sterile field, draping, passing instruments and supplies, performing counts and preparing supplies. Builds upon and reinforces the role of the Surgical Technologist as a member of the operating room team. Discusses care of the patient before, during and after surgery with emphasis on surgical wounds, wound closure materials, and vital signs.</p>	
<b>COURSE NAME: SURGICAL TECHNOLOGY SURGICAL PROCEDURES</b>	<b>Course Number</b>
	<b>Hours: 60 Total</b>
<b>LEARNING OBJECTIVES</b>	
<p><b>Surgical Technology Surgical Procedures</b> provides the foundational knowledge of surgical core and specialty procedures. Examines the pathophysiology, diagnostic interventions and surgical interventions for a variety of surgical procedures. Incorporates integration of basic health sciences and technical knowledge to complete a plan of action for a surgical procedure.</p>	

<b>COURSE NAME: SURGICAL TECHNOLOGY CLINICAL</b>	<b>Course Number</b>
	<b>Hours: 165 Total</b>
<b>LEARNING OBJECTIVES</b>	
<p>In <b>Surgical Technology Clinical</b>, students will apply basic surgical theories, principles, and procedural techniques in the operating room. Students begin to function as team members under the guidance of the instructor and authorized clinical personnel. Surgical rotation case requirements are documented. Further experience in a clinical setting allows the student to continue to improve technical skills while accepting more responsibilities during surgical procedures. Enhances the student's technical experience and employee skills. Serves as a transition between student and employee. Application of advanced skills for the entry-level Surgical Technologies in the clinical setting.</p>

\*\*Cross-Cutting Competencies are defined in the Competency Model Clearinghouse:

<https://www.careeronestop.org/CompetencyModel/competency-models/building-blocks-model.aspx>.

Cross-Cutting Competencies identify transferable skills – sometimes called “soft skills” or “employability skills” – that are important for workplace success, regardless of a person’s occupation. Still, the relative importance of specific Cross-Cutting Competencies differs from occupation to occupation. The Cross-Cutting Competencies table, above, provides information about which of these competencies is most important to be successful in a particular occupation. This information can be useful to employers or intermediaries in screening and selecting candidates for apprenticeship programs, or to pre-apprenticeship providers that seek to prepare individuals for successful entry into an apprenticeship program.

The names of the Cross-Cutting Competencies come from the U.S. Department of Labor’s Competency Model Clearinghouse and definitions for each can be viewed at <https://www.careeronestop.org/CompetencyModel/competency-models/building-blocks-model.aspx>.

The scoring system utilized to evaluate the level of competency required in each cross cutting skill aligns with the recommendations of the Lumina Foundation’s Connecting Credentials Framework. The framework can be found at: <http://connectingcredentials.org/wp-content/uploads/2015/05/Connectingtials-4-29-30.pdf>.

# Detailed Job Functions

\* Detailed descriptions are available online from the Association for Surgical Technologists (2011) and the National Center for Competency Testing (2017).

	Core or Optional
<b>Competency A: Prepare the operating room environment according to the surgical procedure</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Identify supplies and equipment needed for the procedure	Core
2. Identify furniture needed in the room	Core
3. Assemble supplies and equipment in the room	Core
4. Verify the presence of surgical team members and patient	Core
5. Anticipate the needs of special patient populations	Core
<b>Competency B: Prepare for the specific procedure</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Gather specific surgical supplies, medications, and equipment based on the surgeon's preference card	Core
2. Check package integrity and expiration date of sterile supplies	Core
3. Obtain specialized patient equipment	Core
4. Perform urinary catheterization	Core
5. Perform skin preparation	Core
6. Assemble and test positioning equipment	Core
7. Don personal protective equipment	Core
<b>Competency C: Establish sterile field</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Follow principles of sterile technique while opening supplies for the surgery	Core
2. Perform surgical hand scrub	Core
3. Don sterile gown and gloves	Core

4. Set up and inspect sterile instruments and supplies for surgical procedures	Core
<b>Competency D: Take preoperative precautions</b>	
PERFORMANCE CRITERIA	
1. Perform preoperative count with the circulating nurse	Core
2. Verify identity of the patient and operative site	Core
3. Verify and label medications and solutions at the sterile field	Core
<b>Competency E: Prepare the patient and surgical team</b>	
PERFORMANCE CRITERIA	
1. Transfer patient to the operating room table	Core
2. Place safety belt and pressure pads on the patient	Core
3. Assist surgical team with gloving and gowning	Core
4. Assist with draping the patient	Core
<b>Competency F: Participate in surgical time out</b>	
PERFORMANCE CRITERIA	
1. Confirm names and roles of all team members	Core
2. Confirm patient identity, surgical site, and procedure	Core
3. Participate in review of anticipated critical events	Core
4. Confirm equipment availability and sterility	Core

## JOB FUNCTION 2: Perform Intraoperative Duties/Activities

--	--	--

\* Detailed descriptions are available online from the Association for Surgical Technologists (2011) and the National Center for Competency Testing (2017).

	Core or Optional
<b>Competency A: Maintain the operating room environment according to surgical procedure</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Ensure aseptic technique is maintained by all OR team members throughout the surgical procedure	Core
2. Maintain suction	Core

3. Maintain temperature	Core
4. Maintain lighting	Core
5. Maintain furniture	Core
<b>Competency B: Provide the surgical team members with supplies required for the procedure</b>	
PERFORMANCE CRITERIA	
1. Obtain the appropriate sutures/needles/stapling devices	Core
2. Prepare and cut suture materials as directed	Core
3. Prepare drains, catheters, and tubing for use at the end of the case	Core
<b>Competency C: Assemble and test materials and specialty equipment during surgery</b>	
PERFORMANCE CRITERIA	
1. Assemble internal stapling devices	Core
2. Verify with the surgeon and the circulating nurse the specific type and/or size of implantable devices	Core
3. Connect and activate drains to the suctioning device	Core
4. Assemble and apply dressing material before transporting the patient to the recovery room	Core
<b>Competency D: Anticipate needs during surgery</b>	
PERFORMANCE CRITERIA	
1. Anticipate the need for retraction to facilitate proper operative exposure	Core
2. Pass instruments and supplies as anticipated during surgery	Core
3. Anticipate the need for and implement suctioning, sponging, and irrigation	Core
4. Anticipate the need for various hemostatic agents based on the type of surgery	Core
<b>Competency E: Provide intraoperative assistance when delegated by a surgeon</b>	
PERFORMANCE CRITERIA	
1. Cauterize when directed by a surgeon	Core
2. Assist in the placement of wound drains	Core
3. Assist with skin closure	Core
4. Assist with the application of casts, splints, braces, and similar devices	Core

<b>Competency F: Handle medications, solutions, and specimens appropriately</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Verify and label medications and solutions at the sterile field intraoperatively	Core
2. Report the total amount of medications and solutions used during the procedure	Core
3. Handle specimens appropriately	Core
<b>Competency G: Perform closing sponge, needle, and instrument counts</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Count and record sponges, needles, and instruments prior to procedure	Core
2. Count closing sponges, needles, and instruments	Core
3. Immediately report any discrepancies	Core

## JOB FUNCTION 3: Perform Postoperative Procedures and Room Turnover

Related Technical Instruction		
KNOWLEDGE	SKILLS	TOOLS & TECHNOLOGIES
Hazardous materials, including sharps, blood borne pathogen safety, and radiological safety Unit procedure for placing used instruments in case cart Standard precautions and procedures	Organizational skills Sterile Technique Assure implants used in the case are communicated to the circulating nurse Applying dressings Connecting drains Connecting ostomy bags	Sterilization equipment Dressings Drains Ostomy bags

	Core or Optional
<b>Competency A: Conduct postoperative patient care</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Remove surgical drapes from the patient	Core
2. Cleanse the patient's skin	Core
3. Apply dressings, connect drains, and connect ostomy bag as needed	Core
4. Assist with patient transfer from the operating table to the stretcher	Core
5. Observe the patient postoperatively for any bleeding and relay status to the surgical team	Core
6. Maintain the sterility of the back table and mayo stand until the patient leaves the room	Core
<b>Competency B: Dispose of waste</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Reduce bioburden from instruments	Core
2. Comply with standard precautions when removing and discarding drapes and waste	Core
3. Dispose all sharps in compliance with standard precautions and procedures	Core

<b>Competency C: Perform room turnover after surgery</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Disassemble the instruments for the decontamination and sterilization process	Core
2. Return unused supplies and equipment to the designated location	Core
3. Disinfect furniture and equipment	Core
4. Remove/transport equipment	Core
5. Dispose of waste	Core
6. Wet vacuum/mop floor	Core
7. Dress the bed	Core
8. Inspect for room readiness	Core

## JOB FUNCTION 4: Assist Circulator

Related Technical Instruction		
KNOWLEDGE	SKILLS	TOOLS & TECHNOLOGIES
Age-related needs of the patient Basic Pharmacology Biopsychosocial needs of the patient Body mechanics Chart review Cultural Awareness Death and Dying Discharge Planning Health and Wellness Infection control Microbiology Patient identification Patient Rights Patient safety Documentation procedures	Post-operative care management Post-anesthesia care Patient catheterization Patient skin prep Cardiopulmonary Resuscitation (CPR) Communication Skills Interpersonal Skills Problem Solving Skills Taking vital signs Identifying and managing complications Repositioning patient Transporting patient Transferring patient	Beepers Wheelchairs

	Core or Optional
<b>Competency A: Assist with/provide patient care</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Assist with surgical preparation	Core
2. Assist with placement of monitoring equipment	Core
3. Assist with positioning of patient	Core
4. Assist with/provide post procedure care	Core
5. Assist with casting	Core
6. Assist with patient transport	Core
7. Assist with patient transfer	Core
<b>Competency B: Assist with supplies and equipment</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Procure additional supplies as needed	Core
2. Transport specimens	Core

3. Pretest equipment for use as directed	Core
--	------

## JOB FUNCTION 5: Recognize and Demonstrate Knowledge of the Maintenance of Surgical Supplies/Equipment

Related Technical Instruction		
KNOWLEDGE	SKILLS	TOOLS & TECHNOLOGIES
Pathophysiology Microbiology Hazardous materials protocols Blood borne pathogen safety Radiological safety State and Federal Regulations/ Occupational Safety and Health Administration (OSHA)	Sterilization procedures	Various sterilizers Flash autoclaves Steri-vac aeration cabinets

	Core or Optional
<b>Competency A: Wash and decontaminate instruments</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Washes instruments	Core
2. Decontaminates instruments	Core
<b>Competency B: Ultrasound, milk, rinse, and dry instruments</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Ultrasound instruments	Core
2. Employs a milk bath for surgical instruments	Core
3. Rinses surgical instruments	Core
4. Dries surgical instruments	Core
<b>Competency C: Assemble Instrument Trays</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Identify and locate instruments	Core

2. Organize instruments in appropriate trays in appropriate organization	Core
--	------

<b>Competency D: Prepare for and operate sterilizers</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Prepare for and operate a peracidity acid sterilizer	Core
2. Prepare for and operate an ETO sterilizer	Core
3. Prepare for and operate a steam sterilizer	Core
4. Prepare for and operate a hydrogen peroxide plasma sterilizer	Core
5. Prepare for and operate a dry heat sterilizer	Core
6. Prepare for and operate a glutaraldehyde disinfection sterilization processor	Core

## JOB FUNCTION 6: Provide safe environment

Related Technical Instruction		
KNOWLEDGE	SKILLS	TOOLS & TECHNOLOGIES
Preoperative safety concerns Intraoperative safety concerns Postoperative safety concerns Electrical Safety Fire Safety Patient safety Hazardous materials protocols Handling of sharps Blood borne pathogen safety Radiological safety State and Federal Regulations/ Occupational Safety and Health Administration (OSHA)	Communication skills	Anaesthesia machine Pulse oximeter Imaging machine Hazardous materials disposal unit Sharps disposal unit

	Core or Optional
<b>Competency A: Maintain a safe preoperative environment</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Initiate preventative and/or corrective actions in potentially hazardous preoperative situations	Core
2. Perform appropriate actions during a preoperative emergency	Core
<b>Competency B: Maintain a safe intraoperative environment</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Initiate preventative and/or corrective actions in potentially hazardous intraoperative situations	Core
2. Perform appropriate actions during a intraoperative emergency	Core
<b>Competency C: Maintain a safe postoperative environment</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Initiate preventative and/or corrective actions in potentially hazardous postoperative situations	Core
2. Perform appropriate actions during a postoperative emergency	Core

<b>Competency D: Practice precautions with critical equipment</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Practice laser precautions	Core
2. Practice electrical safety	Core
3. Practice radiation safety	Core
4. Handle compressed gas tanks and connections safely	Core
<b>Competency E: Practice general safety precautions</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Practice/Adhere to universal precautions	Core
2. Report/document unusual happenings	Core
3. Remove defective equipment from service and report	Core
4. Maintain room organization	Core

## JOB FUNCTION 7: Perform Departmental Responsibilities

Related Technical Instruction		
KNOWLEDGE	SKILLS	TOOLS & TECHNOLOGIES
Departmental Policies and Procedures Patient Rights	Computer skills (with database software, email software, graphics software, internet browsers, medical software [Electronic Medical Record EMR, PracticeWorks Systems Kodak WINOMS CS, Supply documentation software, surgery workflow communication software], Microsoft Office Suite.) Communication skills Interpersonal skills Teaching skills	Computers Database software Medical software

	Core or Optional
<b>Competency A: Receive/participate in department communications</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Receive department communications	Core
2. Participate in departmental communications	Core
<b>Competency B: Inventory supplies</b>	
<b>PERFORMANCE CRITERIA</b>	
1. Identify locations for all supplies	Core
2. Count and record supplies	Core

<b>Competency C: Rotate supplies</b>	
PERFORMANCE CRITERIA	
1. Identify supplies' levels of use	Core
2. Rotate supplies to equalize levels of use	Core
<b>Competency D: Order supplies</b>	
PERFORMANCE CRITERIA	
1. Identify supplies in need of replacement	Core
2. Order needed supplies or submit appropriate order request	Core
<b>Competency E: Use/update surgeon preference cards</b>	
PERFORMANCE CRITERIA	
1. Locate preference card for appropriate surgeon and procedure	Core
2. Know how to identify, locate, and use all items on preference card	Core
3. Identify potential inaccuracies	Core
4. Identify potentially out of date equipment, new processes, or changed surgeon preferences	Core
5. Report concerns so that preference card is appropriately updated	Core
<b>Competency F: Attend inter-/intra-departmental committees</b>	
PERFORMANCE CRITERIA	
1. Participate as a member in inter-/intra- departmental committees as appropriate	Core
2. Record committee meeting schedules and duties	Core
3. Attend scheduled committee meetings	Core
<b>Competency G: Maintain cleanliness of department</b>	
PERFORMANCE CRITERIA	
1. Identify and remedy problems with cleanliness of department	Core
2. Monitor environmental features of operating theaters (such as positive pressure, air-conditioning systems and filters)	Core

## JOB FUNCTION 8: Maintain Professional Responsibility

Related Technical Instruction		
KNOWLEDGE	SKILLS	TOOLS & TECHNOLOGIES
Professional behavior	Stress management skills	Online resources for maintaining professional competencies and certification

	Core or Optional
<b>Competency A: Maintain institutional competencies</b>	
PERFORMANCE CRITERIA	
1. Know required institutional competencies	Core
2. Maintain competencies	Core
3. Attain new competencies as required by institutional or professional changes	Core
<b>Competency B: Practice cost containment</b>	
PERFORMANCE CRITERIA	
1. Identify activities critical to cost containment	Optional
2. Maintain practices that limit costs without sacrificing safety or level of outcomes	Optional
<b>Competency C: Attend/contribute to in-service classes</b>	
PERFORMANCE CRITERIA	
1. Identify and record content and schedule of in-service classes	Core
2. Attend relevant in-service classes	Core
3. Contribute to in-service classes as appropriate	Core
<b>Competency D: Evaluate new equipment</b>	
PERFORMANCE CRITERIA	
1. Identify newly obtained equipment	Optional
2. Confirm proper functioning of newly obtained equipment	Optional

<b>Competency E: Precept new employees/students</b>		
PERFORMANCE CRITERIA		
1.	Maintain supportive relationships with new surgical tech employees/students	Core
2.	Precept new surgical tech employees/students	Core
3.	Monitor and assess knowledge acquisition of new surgical tech employees/students	Core
<b>Competency F: Participate in performance improvement activities</b>		
PERFORMANCE CRITERIA		
1.	Contribute to development of performance improvement plans for partially achieved competencies	Core
2.	Engage in training or experiential activities as specified by performance improvement plans	Core

## STATEMENT OF INDEPENDENCE

The Urban Institute strives to meet the highest standards of integrity and quality in its research and analyses and in the evidence-based policy recommendations offered by its researchers and experts. We believe that operating consistent with the values of independence, rigor, and transparency is essential to maintaining those standards. As an organization, the Urban Institute does not take positions on issues, but it does empower and support its experts in sharing their own evidence-based views and policy recommendations that have been shaped by scholarship. Funders do not determine our research findings or the insights and recommendations of our experts. Urban scholars and experts are expected to be objective and follow the evidence wherever it may lead.
