Family Financial Security Matters for Cities

The financial health of Miami residents

The financial health of cities depends on financially secure residents. When families have little to no savings and experience a disruption in their income or expenses, bills may be missed and consequences such as eviction may result.

The financial security of Miami is tied to the financial health of its residents

**\$6–14
million**

The minimum cost to Miami government of family financial insecurity from eviction and unpaid property taxes and utility bills

124,000

of the 170,000 families in Miami are financially insecure

31%

of Miami residents have subprime credit scores

Among families in Miami, 73% were financially insecure, with less than \$2,000 in savings, compared with 52% nationally.

Financial Health of Miami Residents

Indicators of the financial health of city residents

Three ways of characterizing financial health using credit data

1) Delinquent debt

- Having delinquent debt is an indicator of financial distress
- Delinquent debt is debt that is 60 or more days past due or in collections

2) Credit score

- Credit scores are a composite indicator of overall financial health
- Scores range from 300 to 850; a score below 600 is subprime

3) Credit use

- Having a credit card or other revolving debt indicates access to credit, which families may use to meet their financial needs
- But the share of available credit used is a measure of debt burden

Delinquent Debt

Nearly two in five Miami residents have delinquent debt

Delinquent debt indicates residents have trouble meeting financial obligations

Share of residents with delinquent debt

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: Delinquent debt includes debt that is 60 or more days past due or in collections. Miami and other city residents include consumers with a credit record living within city limits. National and state figures include consumers with a credit record living in the US or within Florida. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau).

There are geographic disparities in delinquency within Miami

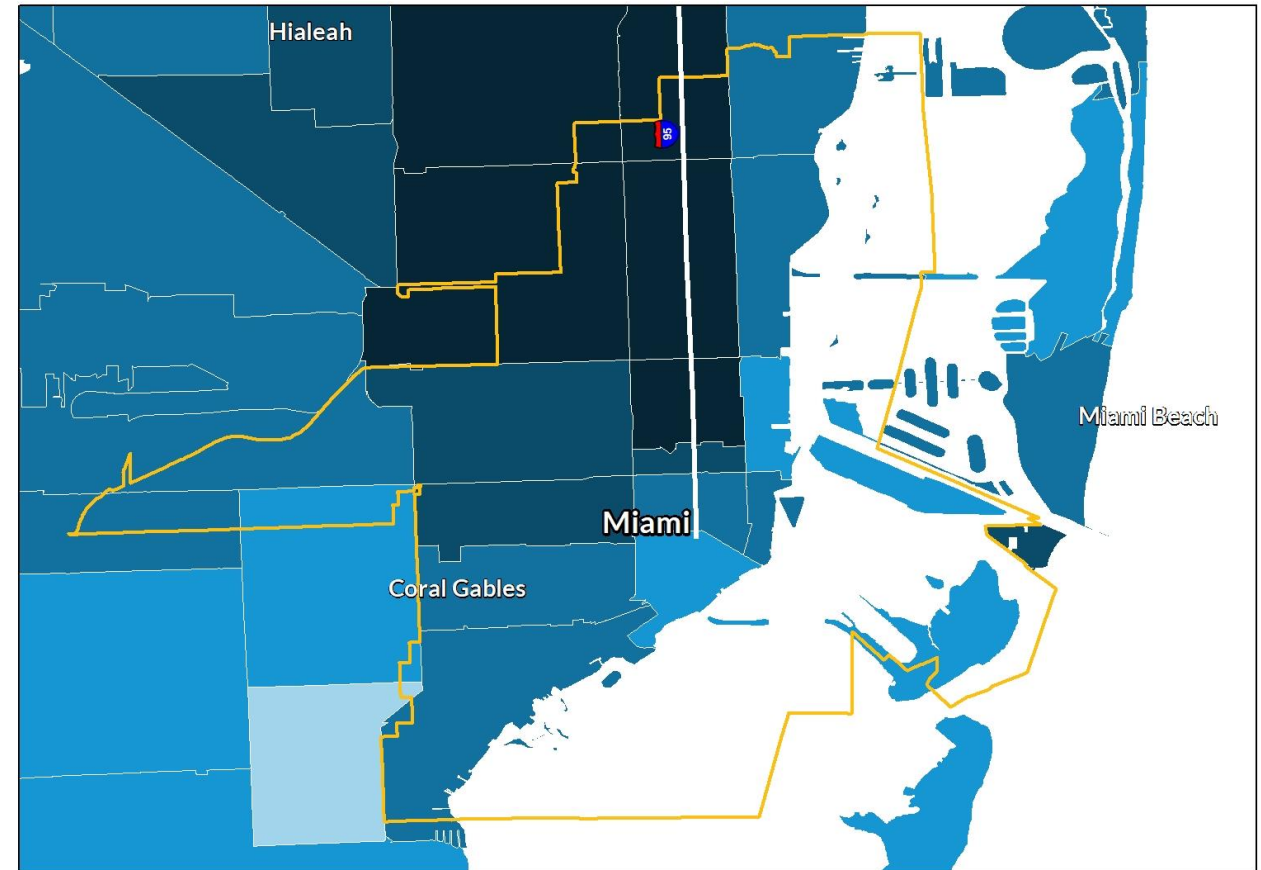

In some neighborhoods, more than half of residents have delinquent debt

Percent of residents with delinquent debt

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: Delinquent debt includes debt that is 60 or more days past due or in collections. Miami residents include consumers with a credit record living within city limits. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau). Data are visualized at the zip-code level.

Some Miami residents struggle with medical debt

One in seven residents have medical debt in collections, slightly below the national average

Share of residents with medical debt in collections

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: Miami residents include consumers with a credit record living within city limits. National and state figures include consumers with a credit record living in the US or within Florida. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau).

Student debt may be a challenge for some Miami residents

One in nine residents with student debt have loans in collections, on par with the national average

Share of student loan holders with student loan debt in collections

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: Student collections are among those with any student loan debt. Miami residents include consumers with a credit record living within city limits. National and state figures include consumers with a credit record living in the US or within Florida. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau).

Summary of findings on delinquent debt

- 1) Delinquent debt is a measure of financial distress. It indicates that residents have trouble meeting financial obligations.
- 2) Nearly two in five Miami residents have delinquent debt, a rate that is on par with the US and Florida state averages.
- 3) In some Miami neighborhoods, more than half of residents have delinquent debt.

Credit Score

Credit health affects residents' costs of living

Having a subprime credit score increases the costs of common consumer purchases

Source: Elliott and Lowitz. 2018. What Is the Cost of Poor Credit. Washington, DC: Urban Institute.

Many Miami residents have subprime credit

Nearly half of residents have a credit score that is below prime, slightly higher than the national average

Share of residents by credit score range

Source: Urban Institute tabulations from a major credit bureau, 2018.

Notes: The VantageScore credit score ranges from 300 to 850. Subprime scores range from 300 to 600, near-prime from 601 to 660, and prime or more from 661 to 850. Miami residents include consumers with a credit record living within city limits. National and state figures include consumers with a credit record living in the US or within Florida. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau).

Miami residents have relatively poorer credit than some other large cities

The median credit score in Miami is below the national median

Median credit score

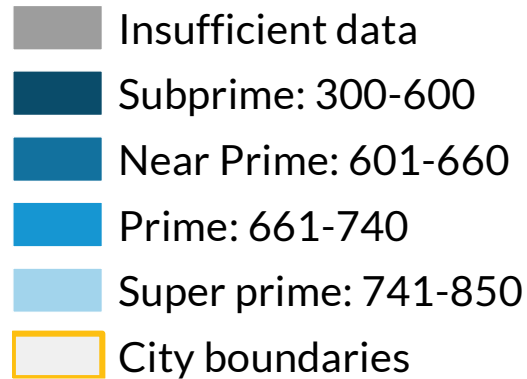

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: The VantageScore credit score ranges from 300 to 850. Subprime scores range from 300 to 600, near-prime from 601 to 660, and prime or more from 661 to 850. Miami and other city residents include consumers with a credit record living within city limits. National and state figures include consumers with a credit record living in the US or within Florida. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau).

There are geographic disparities in credit health within Miami

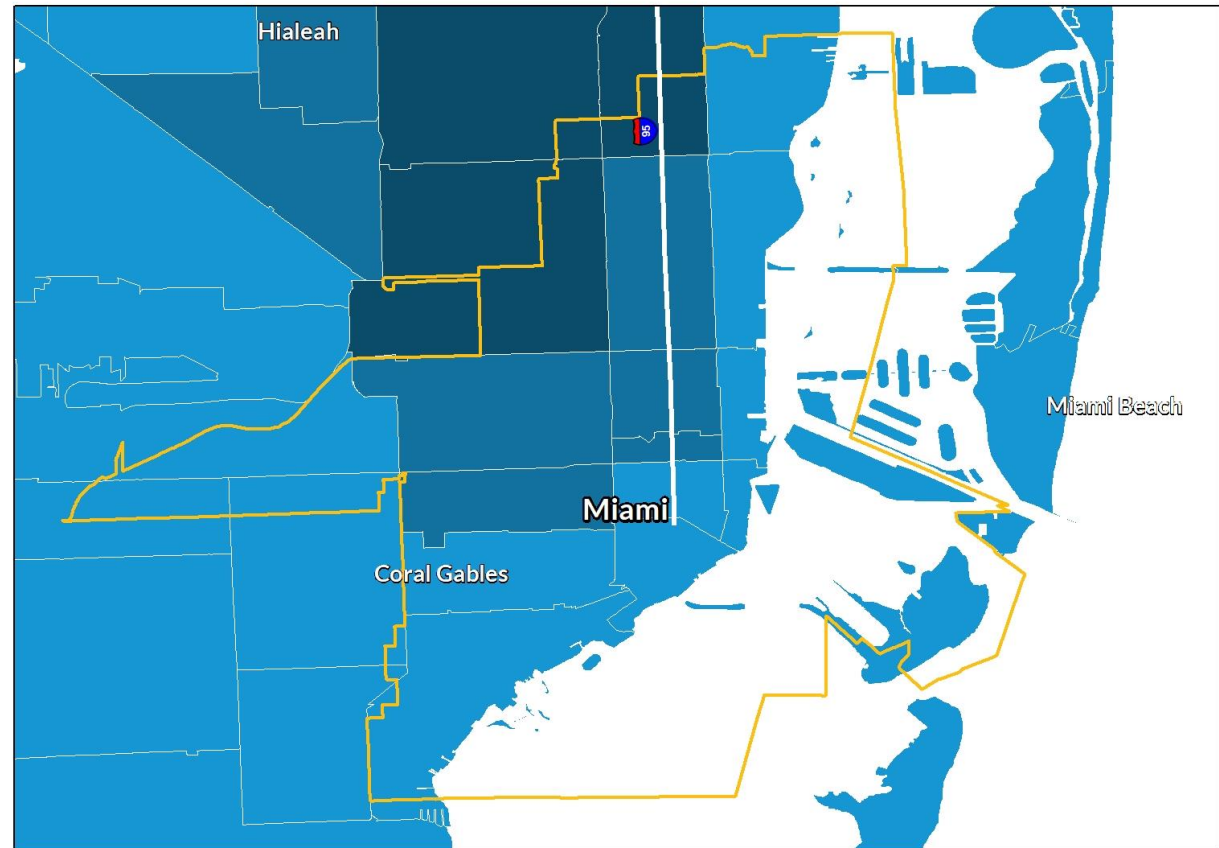

In some neighborhoods, the median credit score is subprime

Median credit score

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: The VantageScore credit score ranges from 300 to 850. Miami residents include consumers with a credit record living within city limits. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau). Data are visualized at the zip-code level.

Most Miami residents have healthy credit

Three in five Miami residents have healthy credit, similar to the national average

Share of residents with healthy credit

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: Consumers with healthy credit have at least one line of credit never delinquent in the past year and no lines of credit paid 60 or more days late in the past two years. Miami residents include consumers with a credit record living within city limits. National and state figures include consumers with a credit record living in the US or within Florida. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau).

Summary of findings on credit score

- 1) Credit scores are a composite indicator of overall financial health. Poor credit is costly for city residents.
- 2) Miami residents, on average, have poorer credit compared with US residents or residents of some other large cities.
- 3) In some Miami neighborhoods, the median credit score is subprime, while in others it is prime or higher.

Credit Use

Many Miami residents have access to credit

A credit card or other sources of credit can help residents meet their financial needs

Share of residents with credit card or other revolving credit

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: A revolving account is one in which the credit may be used or withdrawn repeatedly up to a pre-approved credit limit. Credit cards are the most common type of revolving account. Miami residents include consumers with a credit record living within city limits. National and state figures include consumers with a credit record living in the US or within Florida. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau).

Credit burden for Miami residents is slightly higher than the national average

Credit card holders using a larger share of their available credit have larger debt burdens

Share of available credit used, among credit card holders

Source: Urban Institute tabulations of data from a major credit bureau, 2018.

Notes: Available credit is the credit amount available for the borrower to use; the amount difference between the credit limit and outstanding balance. Miami residents include consumers with a credit record living within city limits. National and state figures include consumers with a credit record living in the US or within Florida. Approximately 89 percent of US adults have a credit record (Brevoort, Kenneth P., Philipp Grimm, and Michelle Kambara. 2015. *Data Point: Credit Invisibles*. Washington, DC: Consumer Financial Protection Bureau).

Summary of findings on credit use

- 1) Having a credit card or other revolving debt indicates access to credit, which families may use to meet their financial needs. The share of available credit used is a measure of debt burden.
- 2) Most Miami residents have access to these sources of credit. The credit burden faced by Miami residents with a credit card is slightly higher than national average.

Key takeaways

- Residents' financial health is linked to cities' financial health.
- Steps cities can take:
 - Offer financial coaching, counseling, and innovative uses of technology to help build residents' financial well-being, including savings strategies.
 - Integrate financial interventions—such as those that help residents repay rent and utility debt—into other programs to meet people where they are.
 - Make saving easy through incentivized programs that provide matching funds to help residents build an emergency savings cushion and move up the economic ladder.
- To learn more about how Miami's financial health compares to similar cities across the country and specific actions cities can take to improve their residents' financial health, explore Miami's profile on our [interactive City-Level Dashboard](#).

Thriving Residents, Thriving Cities

The economic health of cities and communities depends on residents' financial health and stability. When residents thrive, cities are better able to thrive. And when residents struggle to make ends meet, cities can too. By improving family financial health, cities can bolster their own financial security and ensure that all residents have the chance to succeed.

Debt in America: An Interactive Map

Credit can be a lifeline during emergencies and a bridge to education and homeownership. But debt, which can stem from credit or unpaid bills, often burdens families and communities and exacerbates wealth inequality. This map shows the geography of debt in America at the national, state, and county levels. How does your community compare?
