

Incremental Medicare Reforms could give enrollees **MORE FOR LESS**

Traditional Medicare will cover a projected **39.4 million people** in 2020 and covers:

Hospital Care
Part A

Doctor Visits
Part B

Prescription Drugs
Part D

A streamlined approach would **simplify cost-sharing rules** and **add financial protection** for Medicare beneficiaries.

\$500
combined deductible

vs.

\$1364 deductible per hospital episode

25%

coinsurance for doctors and prescriptions

vs.

\$185 annual deductible + 20% coinsurance & \$415 deductible for prescriptions

\$6,700
out-of-pocket maximum

vs.

NO out-of-pocket maximum

Out-of-pocket costs would **decline about 20%** (\$212) per Medicare beneficiary

69%
would see their costs fall by **5% or more**

32%
would see their costs fall by **more than 30%**

Overall, Medicare's share of covered services would **increase from 83.4% to 86.4%** or \$791 per enrollee.
