OVERVIEW OF IMMIGRANTS’ ELIGIBILITY FOR SNAP, TANF, MEDICAID, AND CHIP

Project Purpose

The Immigrant Access to Health and Human Services project maps and describes the legal and policy contexts that govern and affect immigrant access to health and human services. Through a synthesis of existing information, supplemented by in-depth visits to purposively selected sites, the study aims to identify and describe federal, state, and local program eligibility provisions related to immigrants, major barriers (such as language and family structure) to immigrants’ access to health and human services for which they are legally eligible, and innovative or promising practices that can help states manage their programs.

Background

Immigrants’ access to health and human services is shaped by complex federal rules on eligibility and differences in state and local policy and practice. The 1996 Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA), also known as welfare reform, introduced restrictions for federal means-tested benefits related to immigration status and length of U.S. residence. Welfare reform and later legislation set parameters for states’ use of federal and state funding and increased states’ authority in administering public benefit programs. The resulting federal and state provisions regarding immigrants’ access to health and human services have created a patchwork of complicated and often confusing eligibility rules, and in policies and practices that vary across benefit programs and states.

These complexities in eligibility provisions and state and local variation in policy and implementation create the need for a timely and up-to-date study that describes the policy context affecting immigrant access to public benefits. This brief, part of
the Immigrant Access to Health and Human Services study, describes key federal and state immigrant eligibility provisions to help inform policymakers, program administrators, and communities serving immigrant families and children.

Beyond eligibility restrictions, immigrants face other barriers in accessing public benefits, including lack of knowledge about the programs, confusion about the eligibility requirements, language and cultural sensitivity issues, and fear of adverse immigration consequences. Other issue briefs in this study further explore barriers to access and promising practices that appear to facilitate access.

Overview of Federal Policy

While many immigrants who are lawfully present in the United States are eligible for public benefits, there are restrictions based on citizenship and immigration status that limit their access to several federal means-tested programs. These include many of the programs intended to support work, economic stability, nutrition, and health for low-income children and families: Temporary Assistance for Needy Families (TANF), the Supplemental Nutrition Assistance Program (SNAP), Medicaid, and the Children’s Health Insurance Program (CHIP). Historically, unauthorized immigrants were ineligible for federally funded assistance, but welfare reform in 1996 also restricted access for lawfully present immigrants based on their immigration status, when they arrived in the United States, and length of U.S. residence.

PRWORA established two categories of immigrants: qualified immigrants, including lawful permanent residents (LPRs), refugees, and other protected immigration statuses; and nonqualified immigrants. Nonqualified is not synonymous with unauthorized immigrant status. The group of nonqualified immigrants for public benefit eligibility combines various immigration categories, including lawfully present immigrants such as students and tourists, immigrants in protected statuses such as asylum seekers, and unauthorized immigrants (see figure 5 for definitions).

The second important provision of welfare reform was to make a distinction for qualified immigrants arriving prior to the enactment of PRWORA (August 22, 1996) and those arriving after, and to further divide the latter group into those with five or fewer years versus more than five years in the United States in qualified status. Welfare reform limited access to public benefits for post-PRWORA immigrants with less than five years of qualified status, also called the five-year ban. Select groups of immigrants are exempt from the five-year ban: refugees, asylees and other immigrants exempt on humanitarian grounds; and members of the military and veterans (and their spouses and children).

PRWORA also set parameters for states’ ability to administer public benefit programs. First, states can use state funding to cover qualified immigrants during the five-year ban to replace the loss of SNAP, TANF, and Medicaid benefits. States can also provide state-only-funded assistance to nonqualified immigrants. Second, outside of the five-year ban, states are required to cover certain immigrants: refugees and asylees, LPRs with 40 qualifying quarters of work, and members of the military and veterans (and their spouses and children). But states can determine whether other qualified immigrants are eligible for TANF and Medicaid (Broder and Blazer 2010; Fix et al. 2009; Fortuny and Chaudry, 2011).

Detailed information on eligibility under federal law for the specific immigration categories for each program is available in the comprehensive review of literature developed for this study (Fortuny and Chaudry 2011). Some special provisions enacted since 1996 apply to children and pregnant women and are worth highlighting. Since 2002, qualified immigrant children are not subject to the five-year ban for SNAP benefits. Since 2009, children and pregnant women can be eligible for Medicaid/CHIP, including during the five-year
ban, if they reside in a state that has chosen to extend coverage under the Children’s Health Insurance Program Reauthorization Act of 2009 (CHIPRA).

Under CHIPRA, states can receive federal funding to provide Medicaid and/or CHIP to lawfully residing children up to age 21 and pregnant women for 60 days postpartum, including during the five-year ban. The lawfully present group that states can cover is a broader group than the qualified immigrants group as defined by welfare reform. States choosing this option can provide coverage to children only, to pregnant women only, or to both, and can do so through Medicaid only or through both Medicaid and CHIP (NILC 2010a). States that have chosen this option are discussed in the Medicaid section below.

**Key State Provisions**

States can cover immigrants with substitute SNAP, Medicaid, and TANF benefits using their own funding and since 2009, states have the option of covering lawfully present children and pregnant women in Medicaid and/or CHIP. The key state provisions include whether to provide:  
- state-only-funded food assistance to qualified immigrants ineligible for SNAP;  
- state-only-funded substitute TANF and Medicaid benefits to qualified immigrants during the five-year ban;  
- state-only-funded benefits to nonqualified immigrants; and  
- federal/state-funded Medicaid/or CHIP benefits to lawfully present immigrant children and pregnant women as authorized by CHIPRA.

**SNAP**

Seven states, California, Connecticut, Maine, Minnesota, Nebraska, Washington, and Wisconsin, provide state-only food assistance to some qualified immigrants who are not eligible for SNAP (figure 1).

**Figure 1. State-Only Food Assistance**

Source: Fortuny and Chaudry (2011); NILC (2007).
**TANF**
As of July 2009, nearly half of the states (22 states) provide state-only funded cash assistance to some or all qualified immigrants during the five-year ban (figure 2). All nonexempt qualified immigrants were covered in 16 states, while in the remaining six states only certain immigrants, (e.g., battered spouses and children) were covered (Rowe, Murphy, and Mon 2010).\(^{11}\)

In addition, five states (California, Hawaii, Minnesota, New York, and Washington) provide state-only funded assistance for some nonqualified immigrants. For example, California and Hawaii provide assistance to most nonqualified lawfully present immigrants and Minnesota, to persons in temporary protected status (Rowe et al. 2010).

**Figure 2. State-Only Cash Assistance**

![State-Only Cash Assistance](image)

Source: Fortuny and Chaudry (2011); Rowe et al. (2010).

Notes: Data are as of July 2009. Information on state rules is limited to cash assistance only. The Welfare Rules Database includes information on state benefits provided under separate state programs or state-only-funded programs, but only when the benefits are considered part of the same basic program by the state. Thus, the eligibility rules might not include all state-only-funded programs.

**Medicaid and CHIP**
As of March 2011, 22 states and the District of Columbia have chosen to provide Medicaid and CHIP to lawfully present immigrant children and pregnant women who meet the Medicaid state residency requirement (figure 3). Most states cover both children and pregnant women. Five states (Iowa, Montana, Oregon, Rhode Island, and Virginia) cover only children, while one, Colorado, provides coverage to pregnant women only.\(^{12}\)

In addition, states can provide prenatal care to immigrant women otherwise ineligible for Medicaid and/or CHIP under the CHIP unborn child option using federal matching funds (Kaiser Commission on Medicaid and the Uninsured 2009, figure 3).\(^{13}\) Eligibility for this coverage does not depend on the woman’s immigration status and is limited to pregnant women only. As of July 2010, 14 states provide prenatal care, labor, and postpartum care to immigrant women under this option. Six states (California, Massachusetts, Minnesota,
Texas, Washington, and Wisconsin) have chosen both the CHIPRA option for lawfully present immigrant women and the CHIP option for nonqualified immigrants.

Health coverage for immigrants during the five-year ban is limited to children and pregnant women under CHIPRA in most states, but 14 states and the District of Columbia provide state-only-funded health coverage to immigrants other than children and pregnant women (figure 4). State-only funded health coverage is limited based on age, immigration status, disability, and other criteria. For example, Washington provides medical assistance to qualified immigrants who are seniors and persons with disabilities and receive state-only cash assistance (NILC 2010b, 2010c).

Sixteen states and the District of Columbia also provide some health coverage to select groups of nonqualified immigrants using state-only funding. Coverage varies and, in many instances, is limited depending on age, immigrant status, and disability status (NILC 2010b, 2010c). Most of these states are among the states that also provide state-only health coverage to qualified immigrants.

**State Provisions Summary**

Table 1 summarizes states’ provisions on coverage to immigrants for the four means-tested federal programs, SNAP, TANF, and Medicaid and/or CHIP. Coverage includes:

- federal/state-funded Medicaid and/or CHIP for lawfully present children and pregnant women under CHIPRA and to pregnant women under the CHIP unborn child option; and
- state-only food assistance, cash assistance, and health coverage to qualified immigrants during the five-year ban.

California, Minnesota, and Washington are the only states that provide all five types of assistance. Several more states (Connecticut, Hawaii, Illinois, Maine, Massachusetts, Nebraska, New Jersey, New Mexico, New York, Oregon, Rhode Island, and Wisconsin) provide three or four of the five types of assistance.

**Figure 3. Federal and State Medicaid and CHIP**

Discussion

The complexity of federal eligibility provisions and states choices in extending or further restricting coverage for immigrants within the federal framework contribute to vast differences in the ease of access to and participation in public benefits of immigrants across the United States. As a result, income-eligible immigrant families and children have lower rates of participation in the major means-tested programs than families of U.S. citizens and this participation gap varies widely depending on where immigrants live (Capps et al. 2009; Capps and Fortuny 2006; Chilton 2007; Cunyngham 2004; Henderson et al. 2008; Kenney et al. 2010; Perreira and Ornelas 2011). But restrictions to eligibility based on immigration status are just one side of a multifaceted story—a story where eligibility provisions for benefits intersect with policies on immigrants’ social and economic integration, and states’ efforts in facilitating access for hard-to-reach populations (Perreira, et al., forthcoming; Crosnoe, et al., forthcoming).

Previous research has shed some light on the policy context that affects immigrants’ access to health and human services and the unique barriers that immigrants face, including confusion about eligibility requirements and fear of adverse immigration consequences (Fix and Passel 2002; Hagan et al. 2003; Shields and Behrman 2004; Zimmermann and Tumlin 1999); language and literacy barriers (Feld and Power 2000; Kenney et al. 2010; Ku and Waidmann 2003; Perry et al. 2000); and complex application and documentation requirements (Holcomb et al. 2003; Moore and Selkowe 1999; Ng 1999; Tumlin and Zimmermann 2003).

The recent field research for this project in several states reveals that many of these barriers persist (Perreira, et al., forthcoming). The study identifies several factors that matter greatly for immigrant families applying for and enrolling in public benefit programs and that vary widely across the states: complexity of the application process, documentation requirements, and eligibility rules; literacy, language, and cultural sensitivity barriers; transportation and other logistical barriers; the enrollment process and renewal; and climates of misinformation, mistrust, and fear (Perreira, et al., forthcoming). These barriers can be especially pronounced...
for mixed-status families where unauthorized immigrant parents need to navigate the system on behalf of their U.S. citizen children (Henderson et al. 2008; Perreira, et al., forthcoming; Perreira and Ornelas 2011).

e. State provides state-only-funded health coverage to some or all qualified immigrants during the five-year ban. Data are as of July 2010 (NILC 2010b).

The Affordable Care Act (ACA), which will expand access to subsidized health insurance coverage for the nonelderly population, presents opportunities for improving access to health insurance. While unauthorized immigrants are not eligible for any of the ACA provisions, lawfully present immigrants are eligible for the Medicaid expansion (although the five-year ban remains in place) and for subsidies to purchase insurance at the new state health insurance exchanges (Kenney and Huntress, forthcoming). ACA is expected to greatly reduce the health uninsurance rate of many low-income people, including immigrants (Kenney and Huntress, forthcoming). The expansions in coverage and other provisions of ACA—including the development of improved technology to support broad eligibility determinations and streamlined enrollment, and the requirement to provide information in a culturally and linguistically appropriate manner—could also improve access for immigrants to human services programs, including TANF and SNAP (Crosnoe, et. al., forthcoming; Dorn 2011; Kenney and Huntress, forthcoming).

**Definitions**

*Foreign born*: Someone born outside the United States and its territories, except those born abroad to U.S. citizen parents. The foreign born include those who have obtained U.S. citizenship through naturalization and other persons in different immigration statuses. People born in the United States, Puerto Rico, and other territories, or born abroad to U.S. citizen parents, are native born.

*Immigrant*: A foreign-born person who is not a citizen of the United States as defined by the Immigration and Nationality Act, Section 101 et seq (similar to the statutory term “alien”). This definition of immigrant is narrower than some common definitions that treat any foreign-born person as an immigrant, including those who have become naturalized citizens. Since a central focus of this study is on immigrant eligibility, and citizenship is a key factor in determining eligibility for benefit programs, this paper adheres to the legal definition of immigrant.

*Lawful permanent residents* (LPRs): People lawfully admitted to live permanently in the United States by either qualifying for immigrant visas abroad or adjusting to permanent resident status in the United States. Many but not all LPRs are sponsored (i.e., brought to the United States) by close family members or employers.

*Naturalized citizens*: LPRs who have become U.S. citizens through the naturalization process. Typically, LPRs must be in the United States for five or more years to qualify for naturalization. Immigrants who marry citizens can qualify in three years, and some smaller categories can qualify sooner. LPRs generally must take a citizenship test—in English—and pass background checks before qualifying to naturalize.

*Refugees and asylees*: Persons granted legal status due to persecution or a well-founded fear of persecution in their home countries. Refugee status is granted before entry to the United States. Asylees usually arrive in the United States without authorization (or overstay a valid visa), claim asylum, and are granted asylee status once their asylum application is approved. Refugees and asylees are eligible to apply for permanent residency after one year.

*Undocumented or unauthorized immigrants*: Immigrants who are not LPRs, refugees, or asylees and have not otherwise been granted permission under specific authorized temporary statuses for lawful residence and work.

*Lawfully present immigrants* – The term “lawfully present” is used for applying for Title II Social Security benefits and is defined in the Department of Homeland Security (DHS) regulations at 8 CFR 103.12(a). The same definition is also used by the U.S. Department of Agriculture for determining eligibility for food stamp benefits. In 2010, the Centers for Medicare and Medicaid (CMS) issued a guidance to states that further defined “lawfully present” for determining eligibility for Medicaid/CHIP benefits under the Children’s Health Insurance Program Reauthorization Act of 2009 (CMS, “Re: Medicaid and CHIP Coverage of ‘Lawfully Residing’ Children and Pregnant Women,” SHO # 10-006, CHIPRA #17, Center for Medicaid, CHIP, and Survey and Certification, July 1, 2010, https://www.cms.gov/smdl/downloads/SHO10006.pdf). Lawfully present immigrants broadly include LPRs, refugees, and asylees, as well as other foreign-born persons who are permitted to remain in the United States either temporarily or indefinitely but are not LPRs. Some lawfully present immigrants have entered for a temporary period, for work, as students, or because of political disruption or natural disasters in their home countries, and some may seek to adjust their status and may have a status that allows them to remain in the country but do not have the same rights as LPRs.

*Qualified immigrants*: The following foreign-born persons are considered for eligibility for federal benefits:

- LPRs
- Refugees
• asylees
• persons paroled into the United States for at least one year
• persons granted withholding of deportation or removal
• persons granted conditional entry (before April 1, 1980)
• battered spouses and children (with a pending or approved spousal visa or a self-petition for relief under the Violence Against Women Act)
• Cuban and Haitian entrants (nationals of Cuba and Haiti who were paroled into the United States, applied for asylum, or are in exclusion or deportation proceedings without a final order)
• victims of severe human trafficking (since 2000, victims of trafficking and their derivative beneficiaries [e.g., children], are eligible for federal benefits to the same extent as refugees/asylees)

Nonqualified immigrants: Immigrants who do not fall under the qualified immigrant groups, including immigrants formerly considered permanently residing under color of law (PRUCOLs), persons with temporary protected status, asylum applicants, other lawfully present immigrants (such as students and tourists), and unauthorized immigrants.

Five-year ban: Under TANF, SNAP, Medicaid, and CHIP, post-enactment qualified immigrants, with important exemptions, are generally banned from receiving federal means-tested benefits during their first five years in the United States. Detailed immigrant eligibility criteria for these programs are provided in the discussion and tables of the report.

---

1 An immigrant is a foreign-born person who is not a citizen of the United States per the Immigration and Nationality Act, Section 101 et seq.
2 The Food Stamp Program’s name was changed to the Special Nutrition Assistance Program in 2008.
3 This brief focuses on TANF, SNAP, Medicaid, and CHIP. Supplemental Security Income (SSI), Medicare, Social Security, the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), Child Care and Development Block Grant services, and other federal programs are outside the scope of the project.
4 In addition to programs necessary to protect life or safety, nonqualified immigrants, regardless of status, are eligible for some other programs, such as WIC and school breakfast and lunch programs for children. Nonqualified immigrants are also eligible for emergency Medicaid if they are otherwise eligible for their state’s Medicaid program.
5 Immigrants exempt on humanitarian grounds include refugees and asylees; individuals granted withholding of deportation or removal; Cuban and Haitian entrants; Amerasians (Vietnamese Amerasians granted lawful permanent residency under a special statute); since 2000, victims of severe human trafficking; and, since 2007, Iraqi and Afghan special immigrants.
7 For the definition of lawfully present immigrants, see figure 5. Immigrants must also meet the Medicaid state residency requirement (CMS, “Re: Medicaid and CHIP Coverage of ‘Lawfully Residing’ Children and Pregnant Women”; NILC 2010a).
8 A state may only elect coverage in its separate CHIP program if the state has also elected to cover the same population in its Medicaid program. See also CMS, “Re: Medicaid and CHIP Coverage of ‘Lawfully Residing’ Children and Pregnant Women.”
9 The state eligibility provisions are a summary based on recent publicly available information. They alone should not be used for assessing the policy options available to a state under federal law.
10 E-mail communication from Tanya Broder, NILC, March 11, 2011.
11 NILC also lists Tennessee (under the Family First program) and Vermont (under the Reach Up program) as providing state-funded cash assistance to qualified immigrants during the five-year ban (NILC 2008). Alaska, Colorado, and North Dakota provide state-funded cash assistance to certain American Indians born in Canada who can be regarded as qualified immigrants for purposes of eligibility. These states do not provide assistance to other qualified immigrants.
12 A few additional states have pending state plan amendments to provide medical coverage to children and/or pregnant women: Pennsylvania and Illinois through Medicaid, and Delaware, Illinois, Maine, Massachusetts, Montana, and Nebraska through CHIP (NILC 2010b, 2010c). Data provided to the Urban Institute by the Centers for Medicare and Medicaid Services in December 2010 and supplemented in March 2011.
